Professional Experience

Klarna | Nov 2019 - Present | Senior Software Engineer

Made a few improvements that made the application faster, lighter and more robust by replacing unnecessary dependencies by own implementations and making better integrations with monitoring tools. Also, I've been coordinating efforts across the whole company improving communication and integrations between different teams. **Tech Stack:** JS, ES6, React, Jest, Testcafe, Sentry, Splunk, Datadog.

Klarna | Jan 2019 - Nov 2019 | Software Engineer

Migrated tests from the legacy application to the new and made them faster. Migrated several of the features to the new application and created some new ones that helped clients improve their integrations. **Tech Stack:** JS, ES6, React, Jest, Testcafe, Sentry, Splunk, Datadog.

Chess.com | Mar 2017 - Dec 2019 | Software Engineer

Worked on moving from AngularJS to Vue.js in order to improve performance and make the project more scalable. I also had created some features that make the use of the site easier. **Tech Stack:** JS, ES6, Vue.js, Nightwatch.js, LESS.

Tagshelf | Jun 2016 - Present | Lead Software Engineer

Moved part of the website from ASP .NET MVC to React using Typescript, created an integration system between the website and others websites that our users passes data to. **Tech Stack:** C#, ASP.NET MVC, MSSQL, jQuery, .NET CORE, React, Typescript.

AIME | Jun 2016 - Jan 2017 | Lead Software Engineer

Developed a software to gather the information needed to create the disease outbreaks predictions and to analyze them. Also, created a mobile application responsible for showing the predicted data and gather data used for the predictions. **Tech Stack:** C#, ASP.NET MVC, MSSQL, jQuery, Ionic Framework, AngularJS.

Mercofact SA | Jan 2014 - Mar 2017 | Lead Software Developer

Increase company's income by 30% after developing an integration system with one of the biggest banks in Dominican Republic. **Tech Stack:** C#, ASP.NET Webforms, MSSQL, jQuery.

Atlas Solutions & Systems | Sept 2013 – Apr 2015 | Co-founder

One of the first IT services companies to deploy Multi-layer applications and SaaS solutions in the Dominican Republic. In its first year, it reached companies in the United States, Dubai and India. **Tech Stack:** C#, ASP.NET MVC, MSSQL, jQuery, Knockout, Bootstrap, Nodejs.

CREDLI | Sep 2013 - Jan 2014 | Junior developer

Contributed to develop important modules of the loans intermediate website and real time notifications using SignalR. **Tech Stack:** C#, ASP.NET MVC, MSSQL, jQuery, Knockout.

Mercofact SA | Oct 2012 - Sept 2013 | Junior developer

Developed, re-designed and contributed to some implementations on the factoring website like recurrent calendar to call clients, payments integration and others. **Tech Stack:** C#, ASP.NET Webforms, MSSQL, jQuery.

AS Multinivel | Jun 2012 - Sept 2012 | Junior developer

Developed, re-designed and contributed to some modules of a Point Of Sale application like warehouses, accounting, reports and others, that is currently used across the country. **Tech Stack:** C#, Winform, MSSQL.

Education

Pontificia Universidad Católica Madre y Maestra | Aug 2008 - Sept 2013 | Computer Engineering

As final project I created from scratch a system to solve the long queues problem on institutions like hospitals and banks, so you could get your turn on time and see an estimated time from the website or mobile application. **Tech Stack:** C#, ASP.NET MVC, MSSQL, jQuery, jQuery Mobile.

Skills

Software: C#, ASP .NET MVC, ASP .NET Webforms, Entity Framework, SQL Server, **Javascript**, MongoDB, ExpressJS, **NodeJS**, ESLint, AngularJS, **Vue.js**, Vuex, Git, **ES6**, HTML5, JQuery, CSS3, **React**, Yarn, NPM, LESS, **SASS**, Bootstrap, NUnit, Ninject, Nightwatch.js, SpecFlow, **TDD**, BDD, SignalR, JQuery Mobile, **Amazon Web Services**, Azure Cloud Platform, **NPM**, **Webpack**, Scrum, C++, C.

Hardware: Basic knowledge about analog and digital electronic circuits design.

Networking: Basic knowledge with networks based on CISCO technology.

Awards and Honors

2nd Place, Lean Startup Machine Santo Domingo | Sept 2014

The project for this event was Tempdox. We validated our idea by acquiring customers before having the actual product. Customers eagerly wished to have the service offered by the website, which would help them create and generate documents from templates easily, without wasting hours of their time doing the same process over and over again.

Side projects

La liga del código | Podcast about software development based on our experience and interviews. <http://bit.ly/2uFqXSC>

Youtube channel | Motivating people to learn software development by teaching the things I know. <http://bit.ly/2O3Jkz>

Open source contributions | Some highlight projects are: VS Code, Night Owl, Carbon, ChessCom/browser-extension and Webman. See more at my Github profile.
